

Product information

General Purpose (GP) Mop

Characteristics

- Low friction;
- High absorption of dirt;
- Fringes for collection of loose dirt.

The Greenspeed[®] General Purpose Mop or GP Mop is especially for floors that are hard to clean, or cannot be cleaned at all with the microfibre mops. Undoubtedly you have encountered this problem with badly worn or badly conserved floors. The microfibre mops meet so much resistance, that cleaning becomes too strenuous and therefore is not ergonomically justified any more. The GP Mop is the solution for this type of floors.

Only the fringe at the side of the mop consists of 50% microfibre. These fringes collect the loose dirt. Apart from that, the General Purpose Mop is made of a balanced combination of materials enabling easy removal of contaminations such as limescale in bathrooms.

The loop at the side ensures that the dirty surface does not have to be touched while changing mops. This changing is quick and simple because the backing of the GP Mop is made of Velcro. Colour-coded mops guarantee an efficient and hygienic use.

Specifications

Colour	white in combination with green (with coloured labels)
Dimensions	30 cm (28/31 x 12) 45 cm (43/46 x 12) 60 cm (56/60 x 12)
Composition	acrylic, rayon fibre, polyester and cotton
Weight	± 95 gram (30 cm) ± 135 gram (45 cm) ± 174 gram (60 cm)
Filling	n.a.
