

Product information

DiamondMop

Characteristics

- removes caked dirt 'in a jiffy';
- suitable for hard floor surfaces;
- absorption capacity 3 times its own weight;
- efficient use because of colour coding;
- does not damage the surface.

Do you regularly encounter heavily-attached dirt? In that case, the Greenspeed® DiamondMop is indispensable. Thanks to the hardened polyester in the DiamondMop, you clean without damaging the surface. Use this mop on very dirty surfaces, but also in addition to daily mopping of the floor.

You recognise the DiamondMop by its 'wrinkled' material: pleated fabric. This gives the mop extra body and volume, and ensures that the mop will have less friction on the floor. With this mop, uneven floors are also cleaned effortlessly.

The DiamondMop is suitable for any kind of hard floor, which also makes it suitable for sanitary areas.

Specifications

Colour	green
