

Product information

Caddy 200

Characteristics

- Suitable for the Greenspeed® microfibre system;
- Robust;
- Impact resistant synthetic material;
- Modular construction.

The Greenspeed® Caddy 200 is a complete, modular trolley constructed from synthetic material. This trolley is completely adapted to the use of the Greenspeed® microfibre system for the cleaning of interior and sanitary areas with a lot of floor maintenance.

The Caddy 200 has a longer chassis than the Caddy 100 and is equipped with a double bucket combination and a wringer. Due to the modular construction, the

lay-out of the trolley can be adapted to the cleaning activity and the area where it will be used. For example, the sack holder can be replaced with a double sack holder for the separation of waste.

Other models in this Greenspeed® series are [Caddy 100](#) and the more compact models [Caddy 50](#) and [Caddy 75](#).

Specifications

Colour blue with grey frame

Dimensions 130 (l) x 66 (w) x 105 (h) cm

Composition impact resistant synthetic material with enamelled, grey metal frame

Weight ± 23 kilos
