

Breakframe Duo - 40 cm

GENERAL

Duo mop system is ideally suited for large floors.

- Manufactured from high-quality plastic.
- Very user friendly: You can release the frame with a simple foot movement.
- The Breakframe Duo is used in combination with the Twist Mop Duo, a wringer and a double, mop bucket.
- The frame has a universal stem coupling for all stems with a diameter of 24 mm.

The system of the Breakframe Duo is distinguished by its simplicity. The flaps of the mop are clamped to the side of the frame. A big advantage of the Breakframe Duo frame is the ease of use. With a simple foot movement you release the frame and fold it. This allows you to easily squeeze the (dirty) water out of the mop with a roller wringer. The Duo mop system is very suitable for large floor areas.
