

Sprekler ERGO Handle with Integrated Reservoir - 145 cm - with refill bottle 500 ml

GENERAL

Aluminium handle with an integrated water reservoir.

- Controlled water use for the shortest possible drying time.
- No more lugging buckets.
- High mobility.
- Easy to use with an ergonomic & soft handle.
- Rubber grip is also anti-slip helping the handle to stay up against the wall.
- The reservoir can contain 450 ml water, which is plenty to clean up to one-hundred square metres.

The Sprekler has an aluminium handle with an integrated water reservoir. This simple system means no more lugging of buckets nor fuss with wringing. This makes things faster and above all more efficient when caring for a solid floor.

Simply press the handle and a controlled quantity of water is sprayed over the surface. The water pressure in the handle ensures three powerful jets at the base of the Sprekler, even if the reservoir is already more than 70% empty.

The Sprinkler is a perfect partner for cleaning large surface areas, such as entrance halls and corridors. However, it is equally handy for places that are challenging to clean, such as stairwells and sanitary facilities.

USAGE

1. Unscrew the green cap on top of the handle.
2. Fill the reservoir with tap water using the enclosed fill bottle. Screw cap back.
3. Press the green cap on top of the handle to dispense tap water behind the mop through the triple-spray nozzles.
4. Spray and wipe the floor using a circular movement. Start from a corner and wipe the floor clean towards the door.
5. To ensure a long lasting use of the Sprekler handle, empty the reservoir after each use

Sprekler ERGO Handle with Integrated Reservoir - 145 cm - with refill bottle 500 ml

TECHNICAL SPECIFICATIONS

Dimensions product (HxØ) 146 x 3 cm

Colour: green

Composition: aluminium & plastic
